Living with Aussie Wildlife

ACROSS

- 4 Great for hot summer days for us, but without a safe way to get out, I can be very dangerous to wildlife.
- 5 If you see wildlife injured, please take them to see the closest one of these. Or have an adult call 1300 ANIMAL.
- 9 Care for me, because I am home to our Australian wildlife friends
- 10 If you let me, I will roam and hunt birds, marsupials and small mammals, and the wildlife almost always loses!

DOWN

- 1 Where cats should be, so they are not outside hunting wildlife, making babies and getting themselves injured.
- 2 We love to live with you as a part of the family, but have been known to attack koalas. So we need to make sure we are carefully fenced in koala habitat
- 3 Bin it and save wildlife from eating it and getting sick
- 6 Chose native ones and plant us in safe places, and you create homes and food for Australian wildlife.
- 7 You love us and we love you, but we also like to hunt, chase and kill wildlife; so best you don't let our paths cross.
- 8 If cars are going too fast in my area and I am trying to get to the other side of the road to eat more leaves I am in great danger!

Ages 8-13
